Re: Connection of baseball concession building to Boise City water and sewer

The Centennial Baseball Group Inc. would like to request permission to connect Boise City water to our concession building which is located at our baseball facility. The Centennial Baseball Group will assume the financial responsibility and the labor for this project which will include obtaining all necessary permits and inspections from the City of Boise. When the new performing arts center was built, the contractors left a stub out for this future connection, and at this time, we are ready to proceed with this project.

Thank you for this consideration.

Respectfully,

Roger Wolf
