

## Science Student Safety Contracts

Here are the science student safety contracts for your building. Please distribute them to the science teachers. We will be using the same safety contract grades 7-12 in science. These should be used as part of the student science safety training. Every student gets 2 contracts. One for the student to keep in their notebook to refer back to and one for the teacher that has been signed by the parent and the student to keep in a file. Teachers should keep them on file for one year and then dump them and start with a new set the following year.

If you have any questions or concerns please call me.

Thanks,

Suanne McCullough
